H & D Safety Products  
1420 Schertz Parkway, Suite 160  
PMB 171

Dear Mr. Denton:

This letter is confirmation following discussions related to accessories attached to Bullard fire helmets. We wish to clarify our position concerning accessories such as attachments for lighting.

Bullard permits the attachment of lighting mounts provided they are attached in a manor that does not impede or degrade the performance of the helmet to NFPA 1971-2000 structural performance requirements. Please keep in mind, however, your product, when used with our Bullard Fire Helmets are not considered part of the NFPA compliant configuration and has not been tested as such.

Thank you for your continued support of Bullard fire products.

Sincerely,

Tracy Williams  
Fire Helmet Product Manager
